Mopidy-dLeyna is a [Mopidy](#) extension that lets you play music from [DLNA](#) Digital Media Servers using the [dLeyna](#) D-Bus interface.

This extension lets you browse, search, and stream music from your NAS, PC, or any other device running a UPnP/DLNA compliant media server. Compatible devices are discovered automatically on your local network, so there is no configuration needed.

---

# Installation

---

On Debian Linux and Debian-based distributions like Ubuntu or Raspbian, install the `mopidy-dleyna` package from [apt.mopidy.com](http://apt.mopidy.com):

```
apt-get install mopidy-dleyna
```

Otherwise, first make sure the following dependencies are met on your system:

- D-Bus Python bindings, such as the package `python-dbus` in Debian/Ubuntu/Raspbian.
- The `dbus-launch` command, available in the `dbus-x11` package on Debian and Ubuntu.
- The `dleyna-server` package available in Ubuntu 14.04 and Debian “jessie”. For other platforms, please see the [dLeyna installation instructions](#).

Then install the Python package from [PyPI](#):

```
pip install Mopidy-dLeyna
```

---

## Configuration

---

This extension provides a number of configuration values that can be tweaked. However, the *default configuration* should contain everything to get you up and running, and will usually require only a few modifications, if any, to match personal preferences.

### 2.1 Configuration Values

**dleyna/enabled**

Whether this extension should be enabled or not.

**dleyna/upnp\_browse\_limit**

The maximum number of objects to retrieve per UPnP *Browse* action, or 0 to retrieve all objects.

**dleyna/upnp\_lookup\_limit**

The maximum number of objects to retrieve by ID in a single UPnP *Search* action, or 0 for no limit. Note that for this setting to have any effect, the media server must advertise that it is capable of searching for object IDs.

This is an *experimental* setting and may be changed or removed in future versions.

**dleyna/dleyna/upnp\_search\_limit**

The maximum number of objects to retrieve per UPnP *Search* action, or 0 to retrieve all objects.

### 2.2 Default Configuration

For reference, this is the default configuration shipped with Mopidy-dLeyna release 1.1.0:

```
[dleyna]
enabled = true

# maximum number of objects to retrieve per UPnP Browse action, or 0
# to retrieve all objects
upnp_browse_limit = 1000

# maximum number of objects to retrieve by ID in a single UPnP Search
# action (if supported by device), or 0 for no limit
upnp_lookup_limit = 20

# maximum number of objects to retrieve per UPnP Search action, or 0
# to retrieve all objects
upnp_search_limit = 100
```

---

## Change Log

---

### 3.1 v1.1.0 (2016-05-21)

- Add `upnp_lookup_limit` configuration value (experimental).
- Add support for `albumartist` queries.
- Add support for minidlna “All Albums” collections.
- Add track bitrate according to DLNA specification.
- Add basic unit tests for `library` and `playback` providers.
- Update documentation and build environment.
- Various code refactorings and improvements.

### 3.2 v1.0.5 (2016-01-22)

- Specify sort order when browsing.
- Add `apt.mopidy.com` to installation options.
- Remove `Album.images` property (deprecated in Mopidy v1.2).
- Handle exceptions in `dLeynaPlaybackProvider`.

### 3.3 v1.0.4 (2015-11-03)

- Handle uppercase characters in server UDNs.

### 3.4 v1.0.3 (2015-10-24)

- Refactor server handling.
- Handle persistent URIs in `dLeynaClient`.

### 3.5 v1.0.2 (2015-10-16)

- Improve startup error messages.
- Performance improvements.

### 3.6 v1.0.1 (2015-09-12)

- Add workaround for permanently lost media servers.

### 3.7 v1.0.0 (2015-08-21)

- Add `upnp_browse_limit` config value.
- Add `upnp_search_limit` config value.
- Refactor `get_images` implementation.
- Improve debug output.

### 3.8 v0.5.3 (2015-08-19)

- Fix lost server handling.
- Check device's *SearchCaps* when searching.
- Improve log messages.

### 3.9 v0.5.2 (2015-08-18)

- Move mapping helpers to translator module.
- Add `mopidy_dleyna.dleyna.__main__`.
- Update *README.rst*.

### 3.10 v0.5.1 (2015-08-14)

- Start/stop D-Bus daemon from backend.

### 3.11 v0.5.0 (2015-08-14)

- Add support for album art.

### 3.12 v0.4.2 (2015-08-14)

- Use asynchronous D-Bus calls to improve performance on Raspberry Pi.

### 3.13 v0.4.1 (2015-08-11)

- Add workaround for integer conversion issues on 32 bit systems.

### 3.14 v0.4.0 (2015-08-11)

- Start session bus on headless systems or when running as a daemon.
- Use recursive search for container lookups.
- Add browse/search filters.
- Persistent URI handling.

### 3.15 v0.3.1 (2015-04-11)

- Perform search asynchronously.

### 3.16 v0.3.0 (2015-04-10)

- Add basic search capabilities.
- Return proper reference types when browsing.

### 3.17 v0.2.0 (2015-04-08)

- Add workaround for *minidlna* crashing on empty filter.

### 3.18 v0.1.0 (2015-04-07)

- Initial release.
